Business Profile PEC

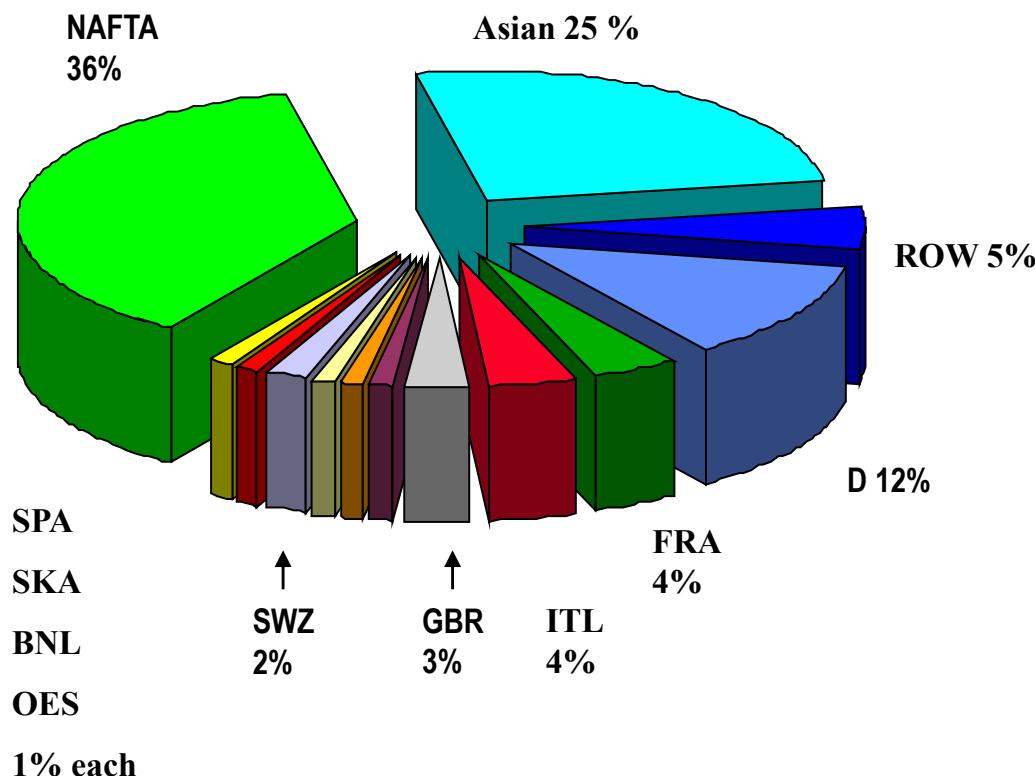

Business Environment	Market 2000	64 Mio Euro (Europe) 187 Mio Euro (World)
	Major Competitors	EPCOS, AVX/TPC, Electronicon, ICAR, Montena Ducati, GE, General Atomics
	Major Customers	Siemens, Bombardier, Alstom, Ansaldo
Position	Sales 2000	8,46 Mio Euro
	Competitive Ranking	No. 3 Europe
	Market Share	13,2 % (Europe) 4,5 % (World)
Strategy	General	Increase market share by product innovation Permanent improvement of cost situation (ratio)
	Market Focus	Europe, Expansion NAFTA and Asia/Australia

Market and Turnover 2000 worldwide

Vishay market placement

- Technically competent partner for all application
- Widest product range for power capacitors
- Full supplier for all capacitor technologies
- Highest flexibility in mech. designs, also for low quantities
- Shortest sampling and delivery time
- Cost and performance oriented products
- Most customer oriented innovations

Standard Capacitor Program

- Lamp and Motor capacitors
- Low voltage power capacitors and plants with power-factor controllers
- Furnace capacitors for mains and medium frequencies
- High-voltage capacitors
- Capacitors for power electronics

Lamp and motor capacitors

Description

motor capacitors

- ↳ 1-60µF, 240-450 V according EN 60252

lamp capacitors

- ↳ 2-60µF 250V 1*-20µF 420/480 V according EN 61048, EN 61049

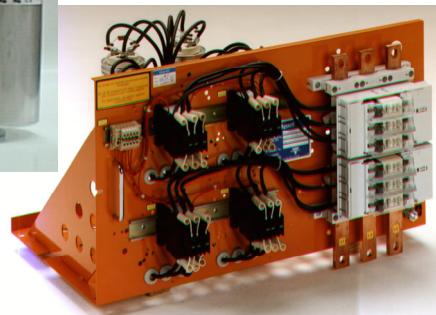

Applications

- ↳ motor operating capacitors which generate the necessary phase displacement for motors supplied from the single-phase system.
- ↳ discharge lamp capacitors used in parallel or series circuits for reactive power compensation

Features

- ↳ with or without **(FP)** or **(FPU)**
- ↳ extremely long operating life
- ↳ very wide temperature range: in certain product from -40°C to + 100°C
- ↳ approved by: VDE, CERTIF, IMQ

Low-voltage power capacitors and plants with power-factor controllers

Description

- ↳ voltage range 230 to 1000 V 50/60Hz,
output 2.5 up to 56.2 kvar for can types, up to
500 kvar per unit with special filter capacitors
- ↳ systems from 12.5 to 800 kvar and higher in
various steps
- ↳ according to IEC 60831/1+2 and 2 EN60831/1+2

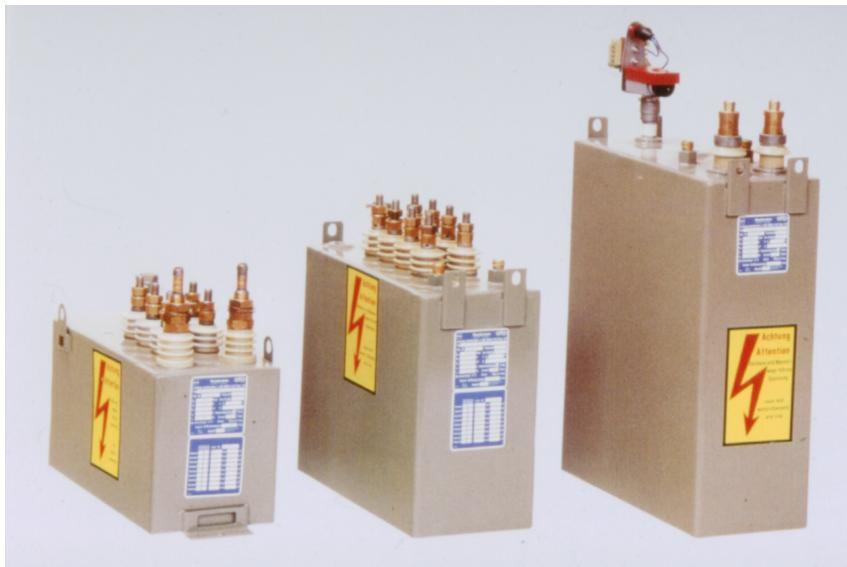

Application

- ↳ individual and group fixed compensation
- ↳ controlled central compensation
- ↳ filter circuits for mains systems with harmonics

Features

- ↳ low-loss, self-healing MKP technology
- ↳ biologically degradable, vegetable-based
impregnating agent, alternatively gas-filled
- ↳ burstproof confirmed by UL and ULC
- ↳ absolutely stable switching, due to high
current-surge load rating
- ↳ adaptable to suit clients' specification
- ↳ long life expectancy with high stable
capacitance values

Furnace capacitors for mains and medium frequencies

Application

- ↳ static power capacitors for inductive heating
- ↳ plant compensation

Types of cooling

- ↳ natural cooling via air circulation
- ↳ forced-air fan cooling
- ↳ water cooling

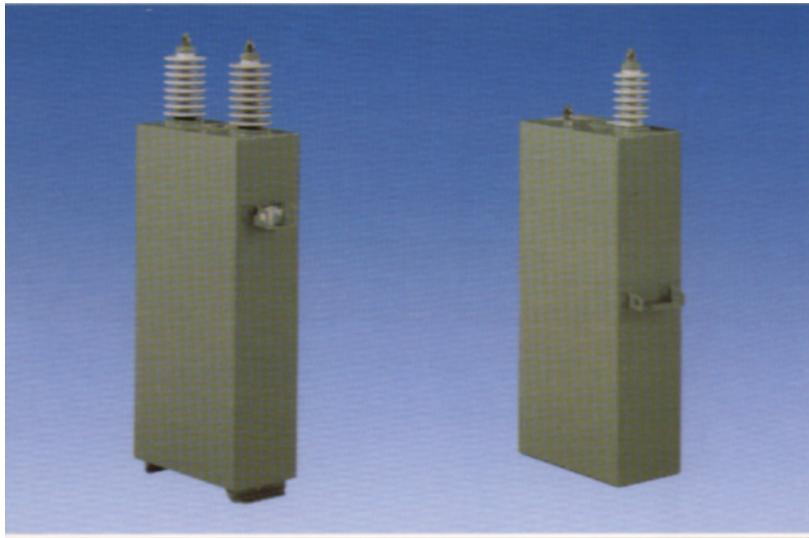

Description

- ↳ mains frequency
220-3000 V, up to 800 kvar per unit
- ↳ medium frequency
50-3000 V, 100-200,000 Hz up to 7,500 kvar per unit

Features

- ↳ compact construction
- ↳ tailor-made design to customer's needs
- ↳ can operate in extreme ambient conditions
- ↳ easy to integrate into overall system concept

High-voltage capacitors

Application

- ↳ individual and group compensation
- ↳ fixed and controlled central compensation
- ↳ overvoltage protection and RC circuits
- ↳ filter circuits for mains systems with harmonics
- ↳ filter circuits for SVC (static var compensation)
- ↳ filter circuits for HVDC transmission
- ↳ series capacitors for power systems

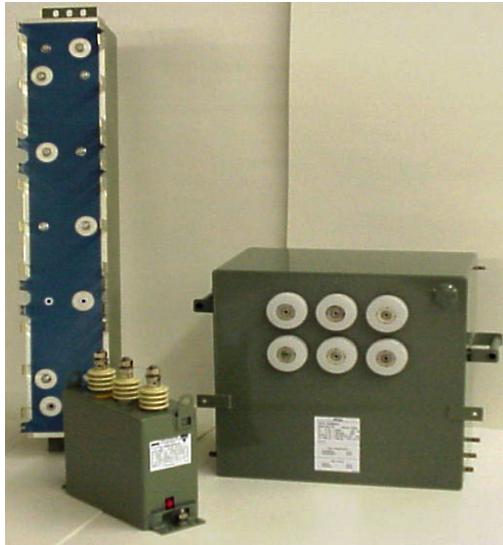

Features

- ↳ voltage and output rating can be matched precisely to client's specifications
- ↳ element fuses for high operating reliability
- ↳ flexible plant design, using racks of our own construction
- ↳ Vishay's own unbalance protection

Description

- ↳ individual capacitors from 660 V to 24 kV, up to 1000 kvar
- ↳ bank installations up to 500 kV, any output
- ↳ standards IEC 60871-1, IEC 143

Capacitors for power electronics

Description

- ↳ DC capacitors up to 10 kV, to 20mF, to 600 A with dry technology
- ↳ DC capacitors up to 100 kV per unit oilfilled
- ↳ AC capacitors up to 24 kV per unit oilfilled
- ↳ standard IEC 61071, customer specifications

Application

- ↳ converters for traction and drives
- ↳ UPS
- ↳ clamping and snubber capacitors for GTO's and IGBT's
- ↳ AC/DC filters,
- ↳ DC supply equipment for radio and TV stations
- ↳ pulsed energy e.g. in laser systems

Features

- ↳ all rectangular capacitors are designed on customers specification
- ↳ dry technology, with segment metallized polypropylene foil
- ↳ shook and vibration proofed

Innovations PEC

High Voltage DC-Capacitors (SH) up to 75 kVDC

Low Inductive DC-Capacitors for Traction and Industrial Converters

HV-DC Capacitors

Description

- ↳ Voltage range up to 75.000 VDC
- ↳ Impulse discharge current >200 k A
- ↳ Energy up to 130kWs
- ↳ Temperature range - 40°C through +60 °C

Applications

- ↳ HVDC Transmission
- ↳ HV testing equipment
- ↳ Impulse discharge
- ↳ Medical equipment

Features

- ↳ High ripple current capacity
- ↳ Highest impulse discharge currents
- ↳ Dielectric selfhealing , non polarized
- ↳ Low dissipation factor
- ↳ Low inductance
- ↳ Stabil against shock and vibration

Low inductive DC Capacitors for AC drives

Description

- ↳ Voltage range up to 2500 VDC/ 550 VAC
- ↳ Capacitance up to 250 µF
- ↳ Ripple Current capacity 100 A
- ↳ Inductance < 30 nH
- ↳ Temperature range - 40°C through 85 °C

Application

- ↳ DC Link in low power industry and traction drives
- ↳ Impulse discharge capacitor (welding equipment)
- ↳ Voltage converters
- ↳ Uninterruptible power supplies
- ↳ Replacement for aluminium electrolytics (lower capacitance but higher currents)

Features

- ↳ High ripple current capacity
- ↳ Dielectric selfhealing , non polarized
- ↳ Low dissipation factor
- ↳ Low inductance
- ↳ Stabil against shock and vibration
